

# TDDH 400 Desiccant Dehumidifier

- Airflow – 450 m3/hr

- Water Removal

AHAM 20°C, 60% R/H – 1.6 (Kg/Hr)

- 240 volt – 7.2 amps

- H-405 x W-350 x D-400 (mm)

- Weight – 20kg

The TDDH 400 Desiccant Dehumidifier impresses with exceptional dehumidification performance, even at low dew point below 0°C and maximum versatility, it can remove up to 80 litres in a 24 hour period. Variable circulating air drying with the TTR 400 ensures power-saving dehumidification at an increased drying rate. It's also equipped with the advanced Duoventic air volume regulation, which allows independent, infinite, electronic control of both fans of the separate air circuits.
