

# Boost Bar Adaptors

- **12 Port Adaptor**

Is the perfect tool for introducing temperature controlled, dry air into hard to reach areas of water damage. Comes with 12 x 3 metre hose extensions.

- **90 Degree Adaptor**

Channels the heated airflow up towards ceiling level or it can be rotated to channel the airflow down in to a subfloor or crawlspace

- **4 Port Adaptor**

Gives you the ability to take heated airflow from the system and deliver it to four separate drying chambers.

These adaptors attach to the DBK Boost Bar to provide greater flexibility when drying different areas.
