

H13 HEPA Filtered Air Conditioner

Due to the current worldwide pandemic Climate Rentals have now combined air conditioning and air filtration/purification to bring you our H13 HEPA filtered Air Conditioners.

The H13 medical grade HEPA filter captures up to 99.95% of airborne particles including viruses, bacteria, mould spores, allergens, pollen and dust.

Available in 4.3kW, 4.9kW and 6.1kW capacity these units were designed with the commercial and industrial customer in mind.

Suitable for a variety of cooling applications where high indoor air quality is at utmost importance including hospitals, medical clinics, vaccination/testing facilities, offices and labs.
