

# DUST MITIGATION

## M45 DUST MITIGATION UNIT

-  **18L PER MINUTE MIST**
-  **45M MIST THROW**
-  **H-2220 X L-1200 X W-1900 (MM)**
-  **WEIGHT - 660KG (DRY)**
-  **FUEL TYPE - DIESEL**
-  **FUEL TANK CAPACITY - TBC**
-  **WATER TANK CAPACITY- 1200 L**

M45AU is a necessity for mining, construction, demolition & transfer station worksites. Designed as an all-in-one solution, the high-powered mist cannon has the ability to throw mist up to 45M, suppressing large areas of dust at an extremely fast rate. Positioned on site in a stand alone position or installed on a utility vehicle, the M45AU is built tough, but can be easily moved around site, allowing you to suppress dust in various locations.

The 340 degree oscillation allows you to throw mist in any direction, and can be operated at a safe distance via the wireless remote control. The M45AU is the peoples choice when it comes to a cost-effective dust control solution. The M45AU is also a great solution for cooling worksites, as the fine mist can drop the air temperature by 10 degrees.
