

DUST MITIGATION

MC20 MIST CANNON / DUST MITIGATION

7L PER MINUTE MIST

20M MIST THROW

H-1330 X D 740 X W-890 (MM)

WEIGHT - 132KG (DRY)

POWER SUPPLY - 240V 15 AMP

The MC20 is a necessity for mining, construction, demolition & transfer station worksites. Designed as an all-in-one solution, the high-powered mist cannon has the ability to throw mist up to 20M, suppressing small to medium areas of dust at an extremely fast rate. With its four solid rubber no-flat wheels, the lightweight MC20 can be easily moved and positioned around the site, allowing you to suppress dust in various locations.

The fixed position gives you superior rigidity and the vertical tilt allows you to throw mist at those hard-to-reach spaces. The MC20 is equipped with a High-Pressure Mist Pump that will provide complete consistent Mist Coverage of the working area.
