

AIR PURIFICATION

HQAIR INDUSTRIAL HYDROXYL UNIT

 AIRFLOW - 2880M3/HR

 COVERAGE - 500M2

 POWER - 240 VOLT

 DIMENSIONS: 740 X 350 X 410MM

The HQ Air Industrial Hydroxyl unit can significantly reduce airborne and surface contaminants with powerful indoor air purification and sanitisation solution designed for office buildings, shopping centres, food processing centres, hospitality venues, healthcare, schools, universities and gyms.

Compact, lightweight and built for durability, the HQ Air Professional unit is only slightly larger than a standard pizza box and can be easily mounted to any internal wall using a standard 240V power outlet. These units are capable of effectively decontaminating rooms up to 500m².
